The 13th International Student Forum

The program is based on the Multilingual & Multicultural Cyber Consortium (MMCC), held mainly at Ochanomizu University since FY2009, and invites participants from overseas partner universities. Initially, with the Great East Japan Earthquake (March 11, 2011) in mind, this event served as a valuable opportunity for students from several countries to exchange views on "disasters" from a global perspective while participating in various activities such as symposiums and study tours together for about a week. This year's event will be held under the theme of "Violence" lurking in our society. Students from Ochanomizu University and Vassar College in the U.S. will present and discuss in English and Japanese.
